Tuesday, July 31st 2012

8:00 am – 2:00 pm

Alfond Center for Health Sciences

UNE Biddeford Campus

FEATURED PRESENTATION

Pain Through the Looking Glass: the Ongoing Convergence of Subjective Narrative and Objective Brain Science

Daniel B. Carr, MD, is a Professor at Tufts University School of Medicine and directs its program in Pain Research, Education and Policy, the only one of its kind in the US. He has published over 300 peer-reviewed articles in pain research, evidence-based medicine, and the social and political aspects of pain relief. He was Founding Editor of IASP's *Pain: Clinical Updates*, lead editor for pain trials in the Cochrane review group on Pain, Palliative and Supportive Care, and serves on editorial boards of pain-related journals. Beyond his work with IASP and the US AHCPR and AHRQ, he has had advisory roles for the USFDA, the American Academy of Pain Medicine, the American Pain Society, the Joint Commission, NIH, and the American Chronic Pain Association. His honors include APS's Fordyce, Distinguished Service, and Narcessian (Educational Excellence) Awards, AAPM's Lippe and Founders' Awards, and citations from the US DHHS. He previously served as Chief Medical Officer and President of Javelin Pharmaceuticals, a biotechnology company that brought several innovative pain drugs into clinical trials. The company was successfully acquired by Hospira Inc. in 2010.

UNIVERSITY OF
NEW ENGLAND

This event is sponsored by the Center for Excellence in the Neurosciences, the Office of Research and Scholarship, Clear H. O, the Michael T. Goulet Traumatic Brain Injury and Epilepsy Foundation, Sea Run Holdings, Inc., Marine Plastics, the Dave and Melinda Anderson Foundation, the Pond Family Foundation, and Edward and Jill Bilsky.
