CARE OF THE UNDERSERVED (CUP) PATHWAY

Experience hands-on on-campus, clinical, and service-based interprofessional learning opportunities, including in a variety of underserved rural, urban, and international locations.

UNE's Center for Excellence in Health Innovation (http://www.une.edu/academics/centers-institutes/center-excellence-health-innovation), and the Interprofessional Education Collaborative (IPEC) (http://www.une.edu/wchp/ipec) are coordinating offerings on underserved care and presenting them to qualified and interested UNE health profession students in order to further develop interprofessional knowledge, skills, and attitudes needed to care for underserved patients as well as to recognize student accomplishments, and to encourage students to seek positions in the future in the care for the underserved. We anticipate choosing 10 – 15 CUP Scholars from each of UNE's participating healthcare programs. Scholars will be expected to routinely participate in activities located on UNE's Biddeford and Portland campus as well as in the greater southern Maine area and maintain a solid academic record.

For interested students, please email this information or submit this completed form by December 15, 2017 to Ian Imbert at iimbert@une.edu.

On a separate document, please answer the following questions (no more than 1 page each):
- Why are you interested in CUP?
- What is your background – education, experience - in caring for the underserved or related topics?

Questions? Contact Ian Imbert, MPH, clinical IPE coordinator (iimbert@une.edu) or Dora Anne Mills, MD, MPH, FAAP (dmills2@une.edu, vice president for clinical affairs and director Center for Excellence in Health Innovation)

"The CUP Program helped me develop the skills I needed to provide quality care for underserved patients during my clerkships."

-Samuel Wood | CUP Scholar | COM Class of 2019

"The CUP Scholar program is hands down one of the most rewarding experiences I've had at UNE."

-Sara Capobianco | CUP Scholar | COM Class of 2019
