This program is approved for both pharmacists and pharmacy technicians.

**Educational Objectives:**
- At the conclusion of this program, participants should be able to:
  - "Basically Complex: Insulin Pump Therapy and Continuous Glucose Monitoring" Describe the basics of pump therapy; Discuss the basics of personal continuous glucose monitors and who is a candidate for such therapy; Discuss how basal and bolus rates are determined; Discuss the different types of pumps and CGMS on the market and what is on the horizon; Share case studies of people with diabetes who are using these products.
  - "Appropriate Medication Prescribing in the Older Adult" Describe common age-associated physiologic changes that take place in the older adult; Evaluate the impact of age-related physiologic changes versus pathophysiologic changes in older adults; Explain the changes in pharmacodynamics and pharmacokinetics that should be considered when determining a treatment plan; Identify barriers to medication adherence and possible solutions for better adherence.
  - "NH PDMP as a Tool in the System of Care" Understand the implementation/roll-out of the PDMP; Understand how the PDMP is a valuable resource; Understand how the PDMP can be used in NH.
  - "Adverse Drug Events in the Diabetic Patient" Review the definitions of drug allergy and adverse drug event (ADE); Discuss ADEs related to the use of DM medications; Identify strategies to prevent ADEs in DM patients.
