Helping Hands, Watchful Eyes; The Role of Home Visiting in Suicide Prevention

Maine Suicide Prevention Program
In Partnership with NAMI Maine and Maine Medical Association

Education, Resources and Support—it’s Up to All of Us.

Suicide in the US, 2015

- 44,193 Americans died by suicide; about 1 person every 11.9 minutes
- Suicide deaths 2.5 times the number of homicides (homicides=17,793)
- 10th leading cause of death across the lifespan
  - 2nd leading cause of death for 15-34 year olds
- Men account for 77% suicides
  - 3 female attempts per male attempt
- Veterans account for 20% of suicides
- Since 2009, suicides have exceeded motor vehicle crash related deaths

Suicide in Maine, 2013-2015

- 9th leading cause of death among all ages (previously 10th, 2012-2014)
- 2nd leading cause of death ages 10-34
- 4th leading cause of death ages 35-54
- Suicide deaths 9x homicide deaths
- Every 1.6 days someone dies by suicide
- Every 2 weeks a young person dies (ages 10-24)
- 233 suicide deaths per year on average
- Firearms most prevalent method of suicide (54%)

Age-Adjusted Suicide Death Rates:
Maine, the Northeast and United States, 2000-2015

Average Annual Suicide Deaths & Age-Adjusted Death Rates, by Age & Sex, Maine, 2012-2014

Data sources: US CDC WISQARS Fatal Injury Data, National Vital Statistics System (NVSS)
Lifespan Suicide Death Rates, by Age, US, 2014
(10 year age groups)

Suicide Among Older Adults
- Highest rate of any age group (for men)
- 87.5% of suicides in Maine are male (2013-15)
- 2013-15 Rates in Maine (17 per 100K)
  - Women: 4.00 per 100,000
  - Men: 34.01 per 100,000
- After age 60 rate declines for women
- Firearms most common means
- 66%-90% have diagnosable mental illness
- 2%-4% completed suicides are terminally ill

 Attempted Suicides - A Call For Help!

Characteristics of Elderly Suicide Attempts

Ask about a history of attempts!
- More secretive: Fewer warnings of intent
- More planful: Attempts more planned, determined
  2/3 have high suicide intent scores
- More lethal:
  Less likely to survive a suicide attempt due to use of more
  violent and immediate methods
- Also more frail

Overall, suicide rates among older adults have fallen since 1930.
What changes in policy, supports, cultural attitudes and healthcare
practices have supported this trend?

What do you see as priorities that would support reduction of
suicide rates among older men?

Suicide in Older Adults

Clarification of Attitudes
Examining Our Own Attitudes

• What associations do we have to the word “suicide”?
• What do we “know” about suicide?
• How has suicide impacted your life?
• What do we “know” about people who are suicidal?

Values Clarification

• Is there a difference between an adolescent suicide and an older adult suicide?
• For someone diagnosed with a terminal illness is it still a suicide?
• What is the difference between “death with dignity” and suicide?
• Is there such a thing as “rational suicide”?

Warning Signs
Risk Factors
Protective Factors

What is the message?

Risk Factors among Older Adults

• Male, white and old old (esp. after losses)
• Depression (esp. untreated),
• Prior suicide attempts,
• Marked feelings of hopelessness,
• Co-morbid medical conditions limiting functioning,
• Pain and declining role function,
• Social/familial isolation/cut-offs or losses
• Rigid inflexible personality
• Access to lethal means (esp. firearms)
• Substance abuse

Men as a High Risk Group

• 80% of suicides
• Gender disparity highest in elders (especially white)
• Gender issues include:
  — Poor help-seeking
  — Men less likely to talk to someone
  — Difficulty recognizing and expressing emotions
  — Increased substance abuse
  — Use more lethal means
  — Feeling like a burden
  — Struggle between belongingness and independence
Warning Signs

What have you seen that tells you that a person is at increased risk?
- In your center?
- In the community/home?

Clear Signs Of A Suicidal Crisis

1. Someone threatening to hurt or kill themselves
2. Someone looking for the means (gun, pills, rope etc.) to kill themselves
3. Someone showing clear distress/ agitation/ anxiety

Get the facts and take action!

Call 911 if lethal means is present
Call Crisis Hotline if no means present

Warning Signs of Suicide in Elders

- Direct or indirect communication
  - Hopelessness, Purposelessness, Isolation,
- Giving away possessions
- Getting affairs in order
- Saying goodbye
- Sudden interest or disinterest in religion (change in interest)
- A specific plan for how they will die

Warning Signs: Depression

Protective Factors

- Skills to think, communicate, solve problems, manage anger and other negative emotions.
- Purpose & value in life: hope for future, pets, life focus...
- Personal characteristics: health, positive outlook, spirituality or religious belief
- Supports: friends, family, and other caring people, health care access, transportation
- Safe Environment – restricted access to lethal means
From a Suicidal Person's Point of View

- Crisis point has been reached
- Pain is unbearable
- Solutions to problems seem unavailable
- Thinking is affected

- HOWEVER:
  - Ambivalence exists
  - Communicating distress is common
  - Invitations to help are often extended
    - Less often or open for older adults

How to Help?

What IS Helpful

1) Show You Care—Listen carefully—Be genuine
   “I’m concerned about you . . . about how you feel.”

2) Ask the Question—Be direct, caring and non-confrontational
   “Are you thinking about ending your life?”

3) Get Help—Do not leave him/her alone
   “You’re not alone. Let me help you.”

Resources for Help

What are YOUR resources?

- 911 or Law enforcement
- Statewide Crisis Hotline (888-568-1112)
- Local Crisis Agency, Mental HealthClinicians and Facilities
- Hospital emergency room staff or PCPoffice/rural health center in rural areas

For follow-up, support & information after the crisis

- Private counselors/therapist
- Faith Community
- Local Health Center
- 211
- Maine’s Intentional Warmline: 1-866-771-9276

MSPP Suicide Prevention Awareness/Youth
When to Call Crisis

- Crisis clinicians are:
  - Available 24 / 7
  - Clinicians can often come to your location for an assessment
- Call for a phone consult when you are:
  - Concerned about someone’s mental health
  - Need advice about how to help someone in distress
  - Worried about someone and need another opinion
- The phone call is free

1-888-568-1112

Crisis Intervention Teams

The Crisis Intervention Team program trains police, correctional officers and first responders about mental illness and methods to deal with mental health emergency and crisis situations safely.

But it is not just a training, CIT transforms how the entire community responds to psychiatric crisis by creating an ongoing collaboration that supports jail diversion.

Key Actions For Healthcare Providers

- Routine standard screening for depression,
- Use collaborative Tx of depression,
- Optimize treatment of pain, anxiety… to address quality of life issues,
- Include collateral folks in treatment discussions
- Active management after a suicide attempt or crisis.
  - Means restriction and safety planning
  - Increased outreach, care management and follow-up
  - Referrals for community programs

Key Actions for Aging Service Providers

- Training for staff on Warning signs and Risk factors and intervention skills
- Depression screening in non-clinical and community settings
- Center-based social programs
- Outreach, outreach, outreach
  - Target isolation
  - Activate family and social; supports
  - Meals on Wheels
  - Home visiting
  - Mail carriers, Faith community, Home handyman services…
  - Other?...

Survivors of Suicide

Effect of Suicide

- The Loss is:
  - Sudden
  - Unexpected
  - Premature
  - Self-inflicted
- The Reaction is:
  - Shock, hurt, anger
  - Loss and grief
  - Questions & torment
  - Guilt and regret
### Survivors of Suicide

- Struggle to make meaning of the loss
- Suffer from overwhelmingly complicated feelings
- May take a long time to grieve
- Need understanding and support
- Youth survivors have special issues

### How YOU can be supportive after a suicide

- Acknowledge the loss
- Use the name of the deceased
- Share your presence
- Share a special memory/story
- Acknowledge the good things
- Stay in touch
- Recommend grief counseling or grief support groups

### Take Care of Yourself

- Acknowledge the intensity of your feelings
- Seek support from others, de-brief
- Share your feelings with family/friends
- Avoid over – involvement. Never act in isolation
- Know that you are not responsible for another person’s choice to end their life

### MSPP Training and Technical Assistance

- Suicide Prevention Gatekeeper Training
- Suicide Prevention: Training of Trainers
  - Supports capacity to offer Awareness Sessions
- Suicide Prevention Protocol Development Training & TA
- Suicide Assessment for Clinicians
