APPENDIX 10

POST-TEST COUNSELING PROCEDURE HIV/HBV EXPOSURE

In accordance with Maine Law (5 MRSA Sections 19201-19208) post-test counseling must occur following an HIV test consented to because of an accidental exposure to blood in a medical, emergency, or an educational setting.

The information and counseling is being given to you by an authorized employee and is held in strict confidence separate from any medical or student record that you may have at the University Of New England.

I have received and understand post-test counseling during which the following topics were discussed:

1. Test results and their reliability and significance:  

2. Social and emotional consequences of this information:  

3. Information of risk reduction and prevention:  

4. Referrals for medical care and other support services:  

A copy of the counseling discussion is provided for information. It is your responsibility to restrict or allow access to the information held therein your discussion.

The University of New England will not release this information without your express written consent.
