Learning Objectives for Pharmacists:
0837-9999-19-085-L01-P

After attending this program, participants will be able to:

1. Define opioid debt and opiophobia
2. Describe how opioid debt and opiophobia impact pain management in patients with medication assisted treatment (MAT)
3. Explain the duration of action for analgesia versus withdrawal suppression for MAT
4. Recognize the pharmacologic activity of buprenorphine and full opioid agonists
5. Distinguish strategies for acute pain management in patients maintained on buprenorphine versus methadone therapy
6. Identify the general principles of pain management in MAT to a patient case

Requirements for Receiving CE Credit:

- Successful completion of post-presentation questions
- Participation at live program
- Complete program online evaluation form
- NABP #
