Learning Objectives for Pharmacists:

0837-9999-19-282-L01-P

After attending this program, participants will be able to:

1. Describe the pathophysiology of non ST-segment elevation myocardial infarction (NSTEMI)
2. Discuss the role of anticoagulants, antiplatelets, and GP IIb/IIIa inhibitors in the pre-catheterization treatment of NSTEMI patients
3. Understand interventions that are performed in the cath lab and their impact on pharmacotherapy needs
4. Recognize medications that may require follow up or intervention in a patient returning from the cath lab

Learning Objectives for Technicians:

0837-9999-19-283-L01-T

1. Recognize therapeutic agents that should be initiated early after the presentation of an acute coronary syndrome (ACS)
2. Identify medications that are likely to be required in the cath lab
3. Express the importance of medication compliance after experiencing an NSTEMI

Requirements for Receiving CE Credit:

- Successful completion of post-presentation questions
- Participation at live program
- Complete program online evaluation form
- NABP #

This program is approved under program provider #0837-9999-19-282-L01-P and 0837-9999-19-283-L01-T by the Accreditation Council for Pharmacy Education for 1 contact hour or 0.1 CEU's

Statement of disclosure: Disclosure will be made on the day of the program regarding any interest or affiliation a speaker may have with a supporting organization.
