Care Management Learning Activities:		
Patient Assessment and Care Planning		
Relevant PCMH Concepts	Care Management and Support (CM) The practice identifies patient needs at the individual and population levels to effectively plan, manage and coordinate patient care in partnership with patients/families/caregivers. Emphasis is placed on supporting patients at highest risk.	Knowing and Managing Your Patients (KM) The practice captures and analyzes information about the patients and community it serves and uses the information to deliver evidence-based care that supports the population needs and provision of culturally and linguistically appropriate services.
Relevant PCMH Competencies & Criteria	<ul> <li><u>Competency A: Identifying Care Managed</u> <u>Patients</u>         The practice systematically identifies patients who may benefit from care management.         <ul> <li><i>CM01 (Core)</i>: Considers the following when establishing a systematic process and criteria for identifying patients who may benefit from care management (practice must include at least three in its criteria):</li></ul></li></ul>	<ul> <li><u>Competency A: Collecting Patient Information</u>         The practice routinely collects comprehensive patient data and uses the data to understand patients' backgrounds and health risks.         <ul> <li><i>KM02 (Core)</i>: Comprehensive health assessment includes (all items required):                 <ul></ul></li></ul></li></ul>

INNOVATION FOR A HEALTHIER PLANET

Center for Excellence in Health Innovation

	a) Work with the practice to identify a complex patient who would benefit from interprofessional care,		
	utilizing the practice's defined protocol and/or factors listed above in <b>CM Competency A</b> –		
	Criterion CM01; and		
	b) Review the patient case as a team and conduct a <b>MOCK</b> pre-visit brief to define profession-specific		
	roles in assessment and care planning.		
	Care should be taken to select a patient whose health status and needs are an appropriate match for the		
	composition of the student team. For example, if a dental student is on the team, a patient with health		
	problems that include oral health or a strong connection to oral health should be selected.		
	2) ADVANCED: Student teams will conduct a comprehensive health assessment for a patient. This assessment		
IP Student	may or may not be part of a complex patient visit (see #3 below). Students will:		
Learning Activities	a) Participate in a <b>team brief</b> to define visit roles and objectives prior to engaging the patient;		
(Students will complete one or	b) Conduct the adult comprehensive assessment, which includes all of the required items as outlined		
more of these activities)	above in <b>KM Competency A – Criteria KM02 &amp; KM03</b> . Additional behavioral health and/or oral		
more of these activities/	health screenings (as noted in criteria KM04 & KM05) may also be provided; and		
	c) <b>Debrief</b> to reflect on team performance.		
	3) ADVANCED: Student teams will interview and examine a patient, according to the practice's established		
	protocols, and involving the patient/family/caregivers as appropriate. The visit may take place at the		
	practice site, in the patient's home, or another site deemed appropriate by the practice, and will include:		
	a) Identification of a complex patient, per the practice's defined protocol and/or factors such as those		
	listed in CM01, and medical record review;		
	b) A <b>team brief</b> to define visit roles and objectives;		
	c) A comprehensive health assessment (found in KM02 - KM05), to include social determinants of		
	<i>health</i> (KM02-G), or other focused assessment;		
	d) A medication management review, per KM Competency D;		
	e) Person-centered care planning, featuring CM Competency B – Criteria CM04-CM08;		
	f) Preparation of a report/presentation of the team's assessment, recommendations and care plan; and		
	g) A <b>team debrief</b> to reflect on team performance.		
	1) The student team will conduct the mock pre-visit brief in the presence of a facilitator, who will give written		
	<ul> <li>feedback to the student team on how well they addressed and participated in key components of the brief.</li> <li>2) ADVANCED: The debriefing on student team performance will include written feedback to the students on areas of strength and needed improvement.</li> </ul>		
IP Student			
Learning Assessment	<ol> <li>ADVANCED: The student team will present their assessment, recommendations, and care plan to</li> </ol>		
	appropriate members of the practice team, possibly including the patient and/or family/caregivers.		
	Following this presentation, the student team and facilitator will utilize the TeamSTEPPS Debrief Checklist		
	(see <i>Resources</i> below) to facilitate the team's reflection of its performance.
