Elder Investment Fraud and Financial Exploitation (EIFFE) Prevention Program

Research shows that elder Americans are at serious risk of becoming victims of elder investment fraud, particularly those with mild cognitive impairment (MCI). As many as 35% of all 25 million persons 71 years of age and older have some form of cognitive impairment or dementia. The results of a recent national survey indicate that as many as 20% of older Americans have already experienced financial fraud or are very concerned about becoming victims of fraud.

For additional information or to register, please contact Nina Bennett at nbennett@une.edu or 207-221-4564 Financial Exploitation of Older Adults Red Flags in Direct Care Settings:

Evidence-Based Screening Tools to Assess for Vulnerability and Resources for Appropriate Referrals

Join us for this for this **free** educational presentation for direct care workers in assisted living communities, nursing care facilities, home care and hospice organizations.

Funding for this training is provided by the University of New England Maine Geriatric Education Center which is funded by the U.S. Department of Health and Human Services Health Resources and Services Administration (HRSA) Grant # UB4HP19207

Monday, April 27, 2015

Caribou Inn 119 Main St. Caribou, ME 04736 1:30PM-3:30PM
