• $700 Book Allowance
• Monthly Meal Card - $140

Providing a diverse and broad-based experience in the fields of Internal Medicine, Surgery, Obstetrics / Gynecology, and Emergency Medicine, the AOA Internship Program offered by Seton Hall University concentrates on hands-on training opportunities for the Interns. The Internship Program allows Interns to actively manage all aspects of daily patient care to include inpatient and outpatient procedures. Full-time faculty train, support and supervise the Interns through the year-long Internship at St. Michael's Medical Center.

Throughout the year, Interns spend time in several ambulatory clinics in multiple specialty fields. A rotating schedule in the Integrated Osteopathic Manipulative Medicine Clinic allows Interns to see patients and serve as Osteopathic manipulative treatment specialists.

Daily Internship education sessions include Resident Rounds and Morning Report. Weekly Grand Rounds, Ambulatory Medicine Lecture Series, Medical Knowledge Self Assessment Program (MKSAP) Board Review, and Journal Club provide an extensive teaching curriculum. The Program provides a tremendous training experience to the Residents who require a Preliminary Year.
