

THAILAND

Global Health

PHP 405 (4 credits)

James Krebs, Pharm.D. | jkrebs@une.edu

This Advanced Pharmacy Practice Experience (APPE) offered each fall explores the concepts of global health as well as contemporary health issues in Thailand. Through lectures and experiential learning, you will learn about unique topics such as social and environmental healthcare in the tropics, traditional and alternative medicine, border health and care of displaced persons, as well as clinical diseases in the tropics such as tuberculosis, avian flu, leprosy, dengue fever, malaria, and HIV/AIDS.

You will travel throughout Thailand visiting a variety of healthcare settings, including large urban hospitals, research laboratories, hospices, orphanages, rural clinics, government public health facilities and non-governmental organizations that work diligently to improve the health of the Thai people and boarding populations. Culture highlights include the Grand Palace, Ayuthaya, Chiang Mai Night Bazaar, Koh Samet Island, and many more! This course is open to fourth year pharmacy students.

Students are encouraged to apply for travel scholarships in the Global Education Office.
