Sponsored by: The Center for Excellence in the Neurosciences and
the COM Biomedical Sciences Department

Dr. Lisa Hodge is an Associate Professor in the Department of Cell Biology and Immunology and holds a joint appointment with the Osteopathic Research Center at the University of North Texas Health Science Center. She is also the Basic Science Research Chair for the Osteopathic Heritage Foundation. Her laboratory studies the role of the lymphatic system during infectious disease, inflammation and cancer. Dr. Hodge is on the Scientific Committee for the Fourth International Fascia

Research Congress, a member of the editorial board for the Journal of the American Osteopathic Association, a member of the Louisa Burns Osteopathic Research Committee, the Osteopathic International Alliance, the Commission for Osteopathic Research Practice and Promotion, the Society for Experimental Biology and Medicine and the American Academy of Osteopathy. She also serves as a peer reviewer for several research journals and study sections at the National Institutes of Health. Her research is funded by the American Osteopathic Association, the Osteopathic Heritage Foundation and the National Institutes of Health.
