The Promises and Pitfalls of Oxytocin for Psychosocial Adjustment

Presentation Information:
Monday, April 25, 2016
12 Noon – 1 PM
Proctor CHP Lecture Hall

About the Speaker:

Dr. Nancy Koven
Associate Professor of Psychology
Bates College

Nancy S. Koven, Ph.D. is a Professor of Psychology and the Chair of Neuroscience at Bates College where she teaches clinical, cognitive, and affective neuroscience and conducts neuropsychological research. She completed her graduate training in clinical psychology at the University of Illinois at Urbana-Champaign, followed by a clinical internship at Eastern Virginia Medical School and post-doctoral fellowship in neuropsychology and neuroimaging at Dartmouth Medical School. Her research examines the intersection of affective and cognitive processing both in at-risk adults and adults with diagnosable mental illness.
