

Top Threats and Prevention Strategies

November 6, 2017

Today's Agenda:
Solving the World's Problems...

What is ***Cybersecurity***?

Cybersecurity On The Rise

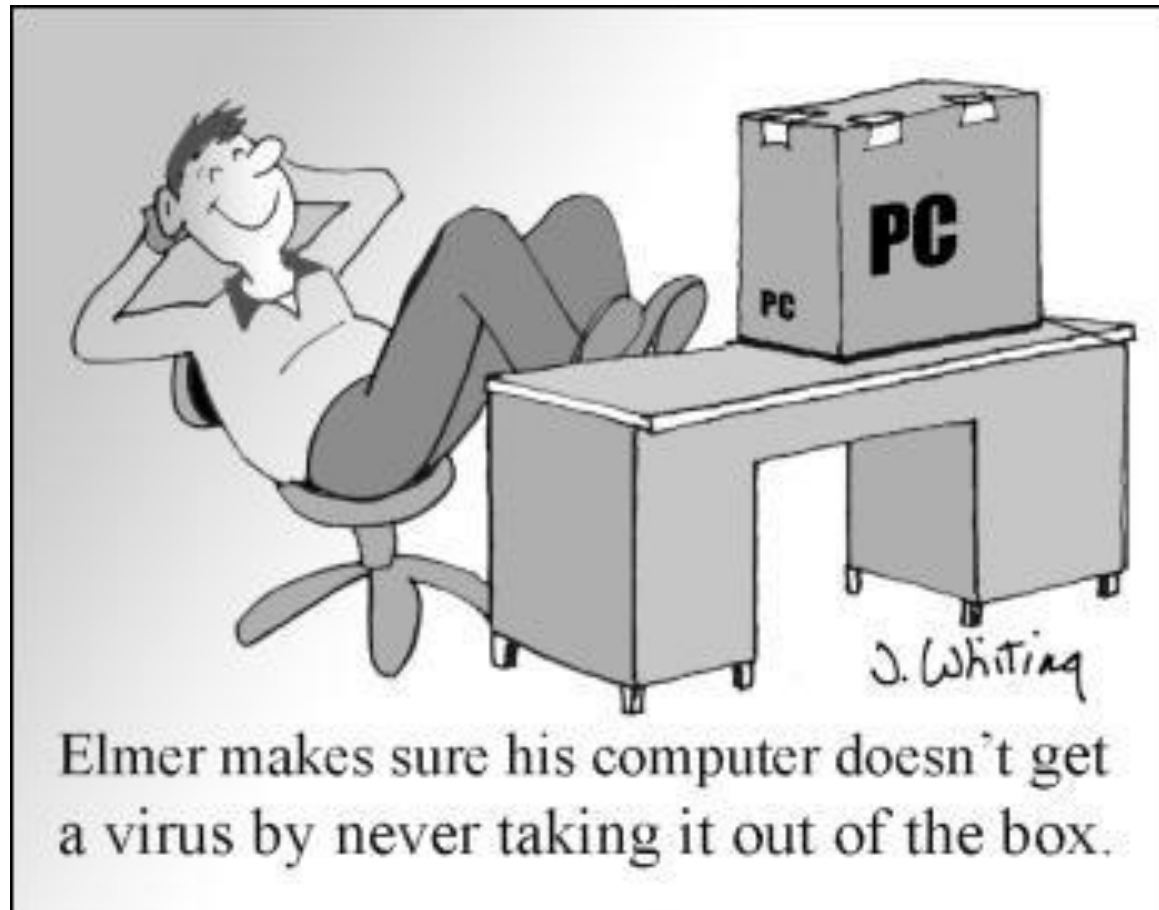

Cyber Threat Targets: *Everyone*

Malware

Software intended to damage or disable computer systems

Ransomware and Extortion

Malware encrypts data until ransom is paid to attacker

Phishing

Attempt to obtain sensitive information through falsely claiming to be a legitimate person or company

Your online bill is ready to be viewed

Dear Respective Customer,

A new bill for your AT&T services is prepared.

Any operations completed after your bill period expires will not be shown in the bill amount listed directly below. If you have made a recent payment, please refer to the current balance on the Account Overview and the Bill & Payments pages.

Service	Account ending in	Bill Amount	Due Date
Home Phone	954	\$902.65	02/19/2013

Log in to online account management to view your bill and bill notices, maintain your email account or make a payment. If you are not registered for online account management, you must do so to view and print your full bill and bill notices at www.att.com/managemyaccount. Log in to online account management to view your bill, maintain your email account or make a payment.
